<ul style="list-style-type: none">Completed a 6-week front-end development internship with mentor-led training and self-paced learningDesigned and developed a real-world project using skills from the IBM SkillsBuild platform.Delivered a final project presentation demonstrating technical and problem-solving skills.	

PROJECTS

Online Book Store

- Developed a Django web app with user login, admin panel, and book/category management.
- Implemented cart, order, payment, and feedback features for a seamless user experience.
- Utilized Django, SQLite, Bootstrap, and Git for design, database, and version control.

Weather-App ([Project Link](#))

- Integrated OpenWeatherMap API to display real-time weather data, such as temperature and humidity.
- Developed geolocation-based auto-detect feature for instant local weather results.
- Ensured a fully responsive layout for optimal performance across all devices.

Spotify Clone ([Project Link](#))

- Created a responsive front-end replica of Spotify's web player.
- Used HTML and CSS for layout and styling, and JavaScript for dynamic interactions.
- Implemented features like play/pause, progress bar, and song metadata display.

CERTIFICATION
